Forecast for Tuesday 28 Jun 2022

Weather: Cloudy with a dry start then rain spreading eastwards from Irish Sea later this morning. The rain becoming persistent and heavier over Southern Lakes this afternoon but the rain light and patchy towards north of National Park.

Chance of cloud-free hill tops above 800m: 70% decreasing 40%, best chance in north and east.

Low cloud and visibility: Scattered low cloud will be associated with the rain band and anywhere exposed to the southerly will see low cloud layers from 500m. Further north and east cloud will be patchier. Similarly with visibility, it will be poor at times around southern fells but will improve further north and east.

Meteorologist's View

A very windy day with gales on the summits.

Forecast for Wednesday 29 Jun 2022

Weather: A dry start to the day and some brightness breaking through, however some lingering mist and low cloud is likely. Some showers developing quite soon in the morning but also a lot of bright and sunny weather, still very windy and winds easing later in the afternoon.

Maximum wind: Southerly 15-20mph gust 30mph.

Chance of cloud-free hill tops above 800m: 80%, scattered low cloud in the morning and then patchy cloud in association with showers.

Low cloud and visibility: Scattered cloud above 500m in the morning and then patchy cloud lowering to 600m in any showers. General visibility will be good by reducing in any showers.

Temperature: **Valleys:** Plus 12 rising to 18 Celsius.
At 800m: Plus 7 rising to 11 Celsius.
Freezing level: Above all summits.
